Submission procedures, details about SIAM’s book publishing process, and other vital information are available from SIAM.

SIAM publishes quality books with practical implementation at prices affordable to individuals.

More information about the series can be found at www.siam.org/books/series/mps-siam.php. Complete information about SIAM and its book program can be found at www.siam.org.

Information about MPS can be found at www.mathprog.org.

MISSION STATEMENT
To promote, through written publications and electronic media, a broad range of works characterized by the highest scientific quality in the field of optimization.

SERIES FOCUS
The MPS-SIAM Series on Optimization covers the entire spectrum of optimization. We welcome traditional research monographs, books on applications, textbooks at all levels, and tutorials. Specific application areas might include such fields as aerospace design, molecular biology, chemical process control, logistics/transportation science, manufacturing, or telecommunications. The aim of such books should be to increase communication between disciplinary specialists in the application area and optimization specialists. Textbooks are especially welcome, as the health of the profession depends on training the next generation of specialists. To this end, our goal is to expand the available selection for undergraduate and graduate optimization courses.

To be considered for the series, a manuscript must advance the understanding and practice of optimization. It must also be clearly written and at an appropriate level. The content must be of high scientific quality.

SIAM BOOK PROGRAM
MISSION STATEMENT
- Actively seek to publish excellent works of interest to students, professional applied mathematicians, engineers, and scientists.
- Engage in continued assessment of the focus of the series and the new and evolving needs of the constituencies served.
- Solicit, through promotions at scientific meetings, ongoing advertising, and personal contact, authors who are experts in topics fitting the focus of the series and who can effectively communicate their expertise to the intended audience. Research monographs must appeal to a broad market, and all books must contribute to the financial success of the series.
- Editorially assist authors in developing effective modes of written, visual, quantitative, and computational communication.
- Aggressively promote the series.
- Monitor production costs so the series can be widely affordable.

BENEFITS OF PUBLISHING IN THE SERIES
Marketing
SIAM develops a specific marketing plan for each book and works closely with authors to market their books aggressively worldwide. About 40% of our book sales originate outside the United States. SIAM combines affordable prices with extensive efforts to reach foreign and local markets via direct mail; space ads; extensive Internet marketing, including SIAM’s own website and relationships with online retailers such as Amazon.com and Barnes & Noble; and displays at exhibitions, workshops, and conferences worldwide. SIAM also works closely with Cambridge University Press, our distribution partner for areas outside North America.

SIAM books are promoted to our more than 11,000 members our entire database of more than 100,000 mathematicians. In addition, we promote to members of many other technical and scientific societies and individuals interested in applied mathematics. SIAM has cooperative arrangements for marketing its publications to other societies and organizations around the world.

Pricing
All books are priced to be affordable to individuals.

Support of the Profession
When you support SIAM’s book program, either as an author or as a customer, you play an important part in SIAM’s mission to promote, advance, and provide programs and media for the applied mathematics and computational science communities.

Quality Control
Our full-time copy editors are familiar with mathematical notation and proofread all manuscripts.

Staff Experience and Flexibility
Our staff is well versed in TeX and other systems and works with authors to accommodate individual needs such as special formatting or graphics.

Personal Attention
Because we publish a limited number of books per year, our staff is able to work closely with every author and editor.

Author Royalty
Author royalties are competitive with those offered by other publishers. In addition, authors receive complimentary copies of their book for personal and promotional use.

Shelf Life
All books remain in print until they are replaced by an updated edition.

Distribution
Books are shipped directly from the SIAM office. Buyers outside North America may also order through SIAM's distribution partner, Cambridge University Press.

BOOKS PUBLISHED IN THE SERIES
Linear Programming with MATLAB
Michael C. Ferris, Olvi Mangasarian, Stephen J. Wright

Variational Analysis in Sobolev and BV Spaces: Applications to PDEs and Optimization
Hedy Attouch, Giuseppe Buttazzo, and Gérard Michaille

Applications of Stochastic Programming
Stein W. Wallace and William T. Ziemba, Editors

The Sharpest Cut: The Impact of Manfred Padberg and His Work
Martin Grötschel, Editor

A Mathematical View of Interior-Point Methods in Convex Optimization
James Renegar

Lectures on Modern Convex Optimization: Analysis, Algorithms, and Engineering Applications
Aharon Ben-Tal and Arkadi Nemirovski

Trust Region Methods
A.R. Conn, N.I.M Gould, and Ph. L. Toint
